Select theme to edit

Editing theme: Default

This menu theme is not currently active as it has not been applied to any menu locations. You may wish to check you are editing the correct menu theme - you can choose a different theme to edit using the 'Select theme to edit' selector above. Alternatively, to apply this theme to a menu go to *Appearance > Menus > Max Mega Menu Settings* and select this theme from the 'Theme' dropdown.

Responsive Breakpoint

The menu will be converted to a mobile menu when the browser width is below this value.

Mobile Toggle Bar

Toggle Bar Designer

Configure the contents of the mobile toggle bar

Click on a block to edit it, or drag and drop it to reposition the block within the toggle bar

Toggle Bar Background

Set the background color for the mobile menu toggle bar.

FROM → TO

Don't forget to update the Menu toggle block text and icon color in the Toggle Bar Designer above!

Toggle Bar Height

Set the height of the mobile menu toggle bar.

Toggle Bar Border Radius

Set a border radius on the mobile toggle bar.

TOP LEFT TOP RIGHT BOTTOM RIGHT BOTTOM LEFT

Disable Mobile Toggle Bar

Hide the toggle bar and display the menu in it's open state by default.

Mobile Sub Menu

Overlay Content

If enabled, the mobile sub menu will overlay the page content (instead of pushing the page content down)

Force Full Width

If enabled, the mobile sub menu will match the width and position on the given page element (rather than being limited to the width of the toggle bar). For a full width sub menu, leave the 'Selector' value set to 'body'.

ENABLED SELECTOR

Off Canvas Width

The width of the sub menu if the Mobile Effect is set to 'Slide Left' or 'Slide Right'. Must be specified in px.

Menu Item Height

Height of each top level item in the mobile menu.

Menu Padding

Padding for the mobile sub menu.

TOP RIGHT BOTTOM LEFT

Menu Background

The background color for the mobile menu.

FROM → TO

Menu Item Background (Active)

The background color for each top level menu item in the mobile menu when the sub menu is open.

FROM → TO

Font

The font to use for each top level menu item in the mobile menu.

COLOR SIZE ALIGN

Font (Active)

The font color for each top level menu item in the mobile menu when the sub menu is open.

COLOR

Mega Menus

Mega Menu Columns

Collapse mega menu content into this many columns on mobile.
